

**Brief Idea**  
**on**  
**Twenty Twenty Warrior's Super speciality Virtual Hospital (TTW-SVH), NCR DELHI**

**Promoted by:** TTW Health Managing Professionals LLP

**Purpose:** Health Centres Integration

TTW-SVH will provide healthcare services in the fields of Dermatology, Medicine, ENT, OBG, Ophthalmology, Orthopaedics, Dentistry, Paediatrics, Psychiatry, Radio Diagnosis, Surgery, TB Chest disease.

TTW-SVH will revolutionise the capacity utilisation of existing healthcare facilities available in the region.

**Concept Note on Technology:**

Indian healthcare sector is serving to provide efficient and timely medical services to each and every Indian citizen irrespective of his or her social status.

The health care sector of india is categorised into;

- Primary healthcare; regulated and governed by the Central or State Governments
- Secondary healthcare is operated by small and mid segment private players
- Tertiary healthcare is operated and managed by corporate houses

During the pandemic period of COVID 19, all the major load of COVID patients is coming on Government health-care and partially on corporate hospitals.

The small and mid segment healthcare centres did not have any role to serve in such epidemic situation as they were functioning under limited capacity of operation.

There is a need to integrate these mid segment healthcare centres with a state-of-the-art distant digital system of operation to build a Super speciality Virtual Hospital (SVH) of twenty-twenty working professionals so that they can also play a vital role in serving the society at large.

This will strengthen them to practice uninterrupted medical services to their patients throughout the country and in turn reducing the burden of patients on government or corporate healthcare institutions.

Thus, a uniform distribution of patients between government and private institutions will help in bringing down physical and financial stresses currently being experienced by the professionals working in healthcare institutions.

**About technology/ project Idea:**

Free marketing of Healthcare Centres and serving them through material and manpower supply for making them competitive and affordable in the market.

TTW\_SVH\_PROOF OF CONCEPT will first be established at TTW – SVH HOSPITAL, NCR DELHI

Application: Twenty-Twenty Healthcare

Purpose: Health Centres Integration
